Prof. Dr. Awad Kazim Al-Khalidi

Course description template

Course Description

The course includes definitions of the principles of financial management and its functions, which include determining the company's future financing needs and the preference between debt and equity financing, in addition to analyzing the type of costs and determining the break-even index. The course also focuses on defining operating leverage, the feasibility of its use, and analyzing financial practices.

College of Administration and Economics - Warith Al-Anbiya University.	1- Educational institution
